

1) Queue schema with array of users and position

```
Name: Leaderboard
Users:[
  {user:{black }, position:1},
  {user:{blue }, position:2},
  {user:{red }, position:3},
  {user:{pink }, position:4},
  ]
```

Add new user to end of the array

On referral move the user 10 positioned move the rest 10 by one position down

Email : black referral:BLACK verified: true joinedRoom: true wonIphone :true	Email: blue referral:BLUE verified: true joinedRoom: true wonIphone :false	Email: Red referral:RED verified: true joinedRoom: true wonIphone :false	Email : pink referral:PINK verified: true joinedRoom: true wonIphone :false
--	--	--	---

2) user schema with email and referral

```
Otp: 4 digit number
email :blue
expiresAt :5min
```

3) time to live schema for otp

##otp schema

```
[ {
